

I respectfully urge you to reject the NAB's petition 04-160. As a satellite subscriber, we obtain services that are not available elsewhere. Living in Northern Indiana, when I travel to Chicago, I now know exactly where I can get Chicago traffic reports. I don't have to fumble around the radio dial as I'm driving in the mess of traffic and also know in advance if there are problems. I am paying for a service and I don't want the NAB to dictate who provides my listening services.

Once again, please reject NAB petition 04-160.

Thanks
